

## **Birds of the Massachusetts Woodlands: An Informational Walk**

**Wednesday, May 30<sup>th</sup>, 8:30 AM – 11:00 AM**

**Copicut Reservoir**

**1 Copicut Road, North Dartmouth, MA 02747**

**(Pull Off North of Dam Road)**

*Rain or shine*

**Are your woods bird-friendly? How can you accomplish your land management goals, while benefiting forest songbirds?**

**Join Michael Labossiere, Forester with the City of Fall River Water Department, Mass Audubon and the MA Department of Conservation and Recreation on this walk in search of forest songbirds. Expert birder Jeff Ritterson will help us identify birds by eye and ear, while MA Licensed Forester Michael Labossiere and DCR Service Foresters will describe the forest management practices that have been applied to the woods to enhance bird habitat. You will leave the field more familiar with species that depend on the Massachusetts woods for breeding habitat, and better able to assess how your own management goals can help these birds flourish.**

**A new program offering landowners bird habitat assessments of their land will also be described.**

**Bring water and dress for moderate hiking over uneven terrain.**

**MA Licensed Forester Continuing Education Credits have been requested for this event.**

**Space is limited. Please RSVP by May 28<sup>th</sup> to [michael.downey@state.ma.us](mailto:michael.downey@state.ma.us) or 413.212.3039.**

***Attendees Please Plan Ahead—No Public Restrooms***
